Dan,

Just received the field report on Westlake below. Larry and I would like to speak with you and Gene first thing tomorrow morning, if possible. We have some serious concerns at this point, if reports in the field are accurate.

Call me at 573-751-3154 to schedule a time. I'm also forwarding you a separate e-mail that has the photos blown up more. It would appear all of this activity has taken place in OU-1.

Subject Westlake Site Visit - Feb. 5, 2008

Ben and I met with Allen Steinkamp, Environmental Manager for Allied Waste. His phone number is 314-739-1919 ext, 114.

Cell phone 636-357-3555.

allen.steinkamp@awin.com

I told him our affiliation with MoDNR, HWP and on behalf of Shawn we were to look at the site for recent changes related to the radiological areas.

He rode with us on a tour showing us stockpiling of soil (see area B) and stockpiling / spreading of demolition material.

There were recent dozer tracks in area B and C. But all three areas (A, B, and C) showed recent activity.

He said other members of their staff were responsible for obtaining the various demolition material and soils and he doesn't know all the sources...but he did know that a lot of material (bricks / concrete, etc) came from the block facility located on the other side of the St. Charles Rock Road.

Here's a pdf with a map and photos.

I'll send a separate email with the large size photos (can see things a lot better from them.)
